What is a Tradeline?

- A tradeline is simply an account that appears on a credit report. It can be a credit card, line of credit, mortgage, or any other loan.
- Each tradeline shows the account's history, payment record, balance, credit limit, and other vital data.

How Tradelines Work in Credit Enhancement

- **Authorized User Tradelines:** By becoming an authorized user on someone else's established credit account, you inherit the account's positive credit history, which can lead to a significant credit score boost.
- **Primary Tradelines:** Accounts where you are the primary account holder offer greater impact since they directly reflect your own credit behavior.

Benefits of Adding Tradelines

- **Faster Credit Score Improvement:** Adding seasoned tradelines can increase credit scores quickly by boosting credit history, reducing credit utilization, and adding positive payment history.
- **Higher Credit Limits:** Lenders often extend more favorable credit limits when they see consistent and low credit utilization across your tradelines.
- **Easier Access to Loans:** With improved credit scores, you become eligible for better interest rates, more substantial loans, and premium credit cards.
